Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Discuss the exposure heads each having a coupled leadscrew nut and being mounted on a common leadscrew and the displacement of the exposure heads being adjusted by the associated leadscrew nut. The applied art, specially in Sawano, does not teach the common leadscrew and the exposure heads being displaced based on the activation of the leadscrew nut. The examiner indicates that an updated search would be needed once a response to the office action is received.
